Please share the following:

- The ND meeting with Region 8, NPS and FWS for Davis Refinery project (near Theodore Roosevelt NP) went well. This meeting was the result of Carl talking to Dave Glatt at the Env Directors' Meeting and requesting early communication. Terry O'Clair, State Air Director, led the meeting. ND was open to very good technical questions and concerns presented by DJ Long and others. ND emphasized that the company's permit application indicates a willingness to go above and beyond regulatory requirements. ND plans to meet with us routinely and will schedule another meeting in about a month to update us on their progress in drafting a syn minor permit. Action items from the meeting included Rebecca Matichuk will check on requirement to use revised Appendix W guidance in this situation (company submitted modeling based on old guidance) and DJ will provide information on fence-line monitoring and controls for several types of equipment. ND will do research several process equipment questions that were raised.

Thanks!

**Subject:** Air Weekly Update

Good morning,

Do you have anything for the Air Weekly Update meeting w/ Martin? It's at 2:30 this afternoon if you're available.

Scott
